

Hoo's Well and the UVA Health Plan are excited to announce a

New Offering!

Beginning January 2017, the UVA Health Plan will cover in full one annual preventive dermatology screening. Any procedures performed during the visit or any follow up visits will be paid according to the copay and cost-sharing provisions of your particular plan. To ensure that you are not held liable for an office visit copay, mention when you request your appointment that you are scheduling your **free skin cancer/dermatology screening**.

Additional details will be shared with you in the coming months. We encourage you to schedule a preventive screening with your dermatologist to take advantage of this offer – it could save your life.
