ACCESS

“I’ve been on HRT since 2016 and have previously found a lot of anxiety when looking for an inclusive doctor’s office. We are more than just our hormones and with FOLX I was finally able to meet a doctor who I immediately felt safe with and could be honest about past experiences. They were so caring and understanding, above all they saw the various aspects that create my identity and respected them all.” - Julius, 28, NY
